

Federal Aviation Administration

Memorandum

Date: 9/12/2006

Walter L Binkley

From: Walter L. Binkley, Manager
Aircraft Registration Branch, AFS-750

To: PD Room Users

Subject: **INFORMATION:** Requests for Expedited Processing of Documents

From time to time the Priority Supervisor in the Aircraft Registration Branch receives requests for expedited processing of documents from customers based on their desire to file amendments or similar related documents to previously filed, but as yet unrecorded documents. As you know, our fundamental statutory mandate is to record documents in the order of their receipt. While the Registry provides priority service in certain limited circumstances, it is our goal to perform the bulk of our registration/recordation work in accordance with our statutory mandate. In furtherance of that goal, routine requests to provide priority service in the processing of documents to support the filing of amendments or similar related documents will no longer be honored. Unusual situations may be brought to the attention of the branch manager for consideration.
